Spanker

SPANKER is a popular Dutch national one-design class boat. She's a plywood hard-chine centerboarder with good racing qualities, plenty of space for comfortable family cruising, and she's easy for amateurs to build. These are precisely the attributes we were asked to incorporate into this boat when we were commissioned to design her.

Right from the beginning, she was a splashing success. This was due to her multifunctional qualities, relatively low price in return for a 'whole lot of boat' and, definitely not in last place, her good looks, accented by the attractive wooden construction details and rich mahogany trim.

In Holland, with its numerous sheltered inland waterways, you will find many young people spending their weekends and holidays on board boats like the SPANKER, camping under a canvas cover in the wide cockpit. Most of these boats are equipped with a 3-5 hp outboard and take their owners nearly everywhere they want to go!
